SESAM event

Abstract

ISA-88 & ISA-95 standards update

The goal for the meeting is to establish an open dialog about the advantages and usage of the standards ISA-88, ISA-95 and related standards from Make2Pack and OMAC.

Dennis Brandl is chairman for ISA-88 and one of the absolute key members across the ISA working groups. Dennis Brandl will explain the current status of the standardization work going on in ISA-88 and ISA-95. What are the key topics in the ISA work groups right now? The current status and the expected future initiatives within ISA-88 and ISA-95 will be covered.

The meeting will also focus on what we can do in Denmark as group of companies to get a better result out of the standardization in respect to automation projects?

Dennis will in respect to this issue, cover the experience done by US companies, and try to emphasize the elements in the standards, where US companies have success. Further-

more, Dennis will try to give a picture of how the US experiences can be transferred to Danish companies.

The new initiative to establish an Industrial Interoperability Compliance Institute – IICI will also be covered by Dennis. What are the advantages and what can we expect in respect to compliance testing of plant operations systems such as ERP, SCM, MOM, LIMS, PLM, SCADA, etc.

We expect to get a good dialog and discussion about the topics and how we in Denmark can benefit from this standardization work and results.

Date: 10th June 2008, 10:00 – 15:00
(lunch included)

Dennis Brandl

Dennis Brandl, founder of BR&L Consulting, has been an instructor in manufacturing IT, PLM for the process industries, batch control systems, business-to-manufacturing integration, validation, and regulated industry compliance for the past 20 years. He is an expert at assisting groups in developing long lasting consensus, documenting the consensus, and developing tools to maintain the consensus. He has led diverse groups in the development of user requirements, systems designs and internationally accepted standards.

Program

09:30 -
10:00

Registration

10:00

- Where are we?
- What are going on in the work groups?
- Which types of scenarios are US companies having success with – in applying the standards?
- How can Danish companies adopt experiences from US companies?
- Why will IICI make a difference?
- Open dialog - room for Q&A discussions

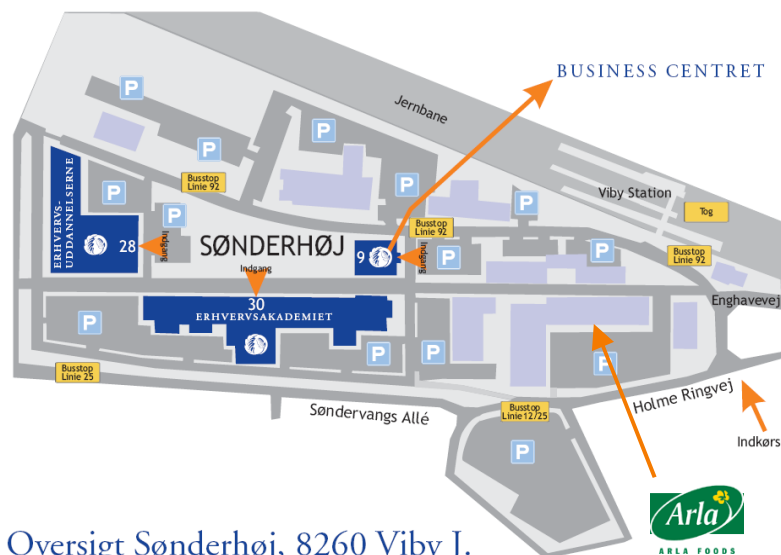

15:00

If you have any interesting issues that you will address to Dennis Brandl before the meeting, please send all information to info@sesam-world.dk

Dennis Brandl will then try to cover the issues on the meeting.

Place

The meeting takes place Århus Købmandsskole, Sønderhøj 9, 8260 Viby J

Oversigt Sønderhøj, 8260 Viby J.

Registration - 06.06.2008

Registration is possible until 6th June 2008

Online: www.sesam-world.dk

Mail: info@sesam-world.dk

Phone: +45 2463 0527

Price: 750,- DKK (excl. 25% VAT)

Members and non members are all welcome to the event.
